

Exhibit 2

Radisson Hotels – Web Server Operations for web-based Hotel Booking Infringement of the '177 patent

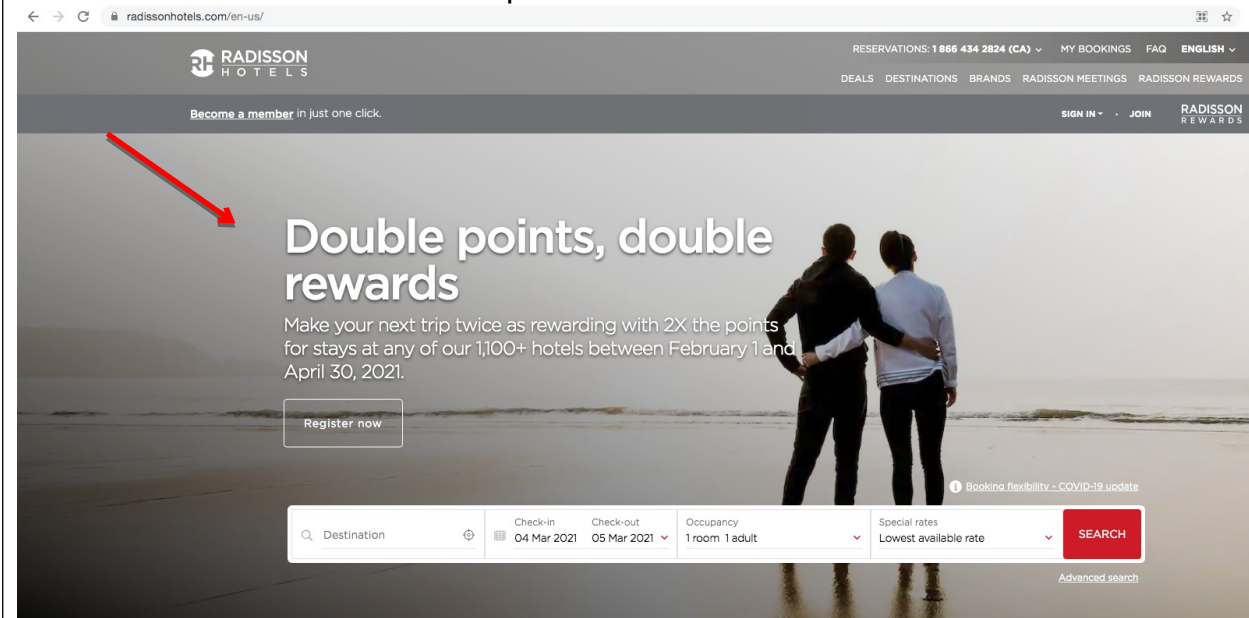

Claim 1

5. A method comprising:

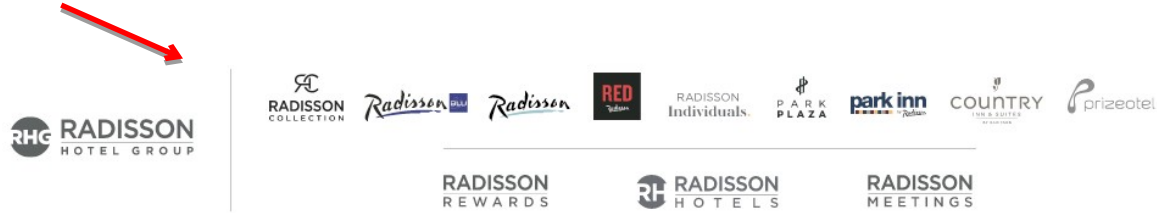

Evidence

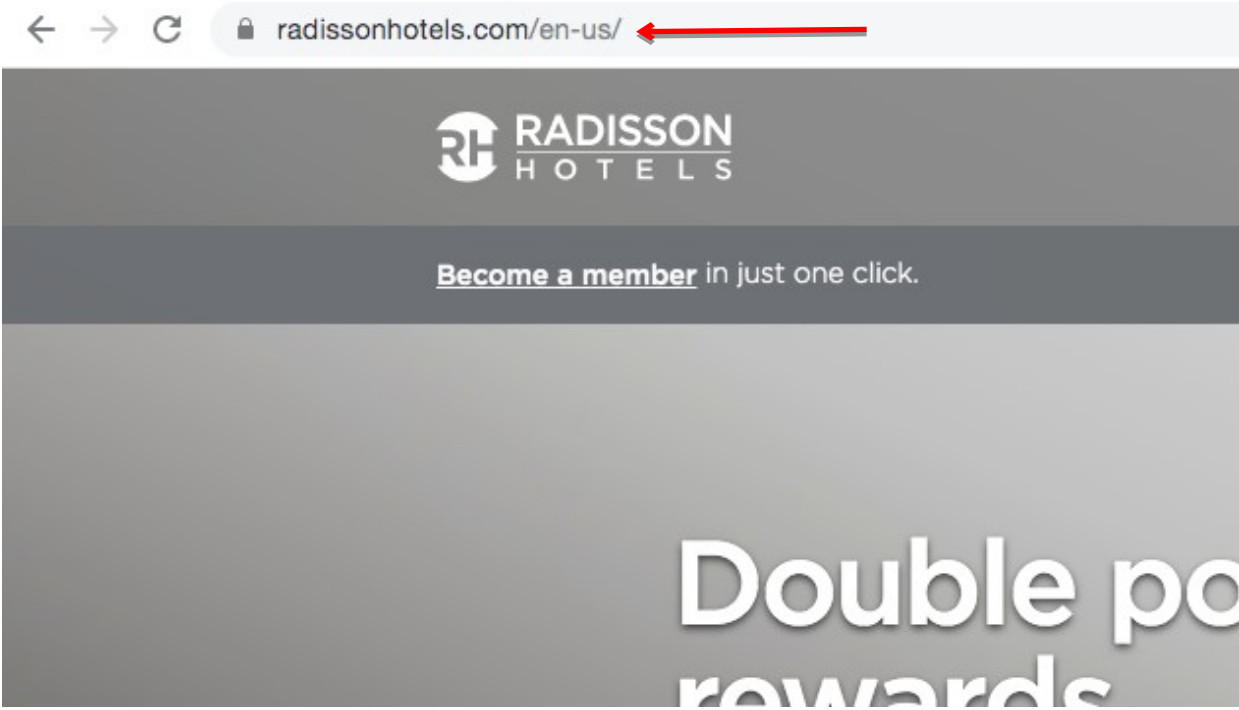

The Radisson Hotels web server performs a method of web-based hotel booking.

For example, Radisson Hotels offers a web-based hotel booking service. Using the service, a user can book a hotel room in any one of the nine brands of Radisson Hotel Group of hotels.

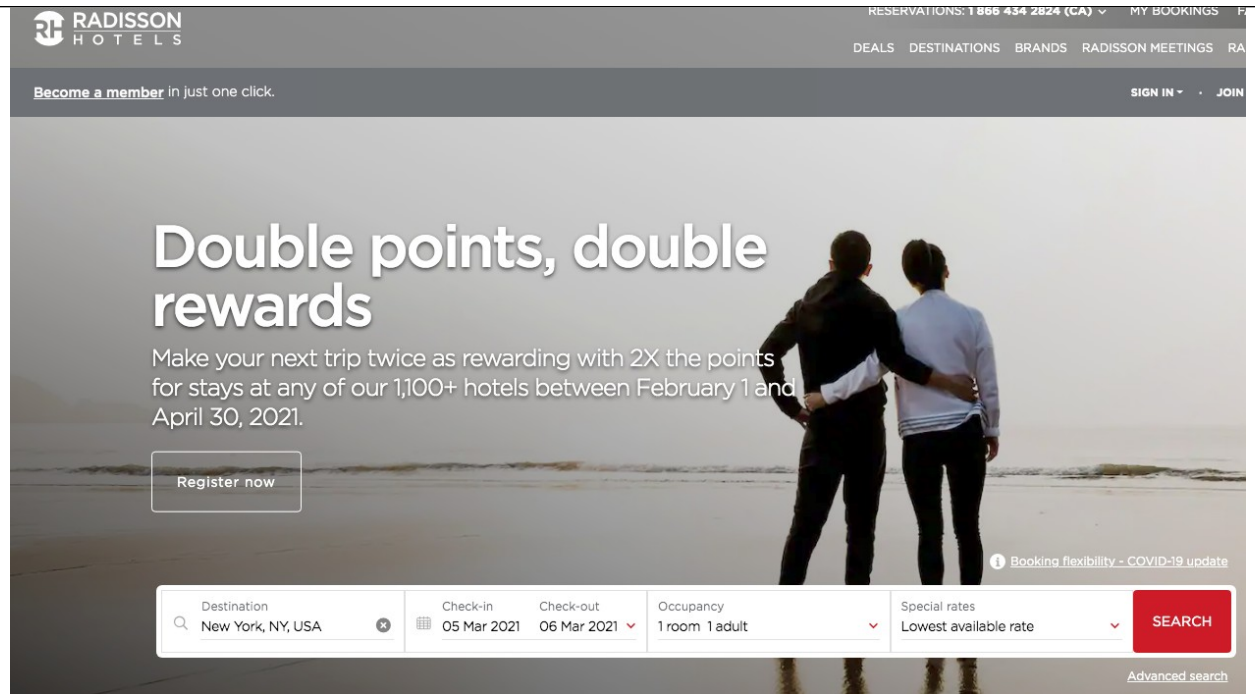

[1]

	 <p>[1]</p>
<p>performing server-side operations to support interaction with a web browser client by generating and serving web page content to a client computer hosting the web browser client,</p>	<p>The Radisson Hotels web server performs server-side operations to support interaction with a web browser client. The Radisson Hotels web server generates and serves web page content to a client computer hosting the web browser client.</p> <p>For example, Radisson Hotels operates the web-based hotel booking service via a web site at an Internet URL location. A server at the URL location provides a web page to a web browser client that connects to the server at the URL.</p>

	 <p>[1]</p>
<p>wherein the web page content is configured to be processed by the web browser client to enable a user of the client computer to browse one or more web pages rendered by the web browser client in response to receiving the web page content, and the web page content includes code to</p>	<p>The web page content is configured to be processed by the web browser client to enable a user of the client computer to browse one or more web pages that have been rendered by the web browser client. The web page content includes code to support user interaction with the one or more web pages via user inputs by the user of the client computer.</p> <p>For example, Radisson Hotels' hotel-booking web site includes an interactive web page for selecting a hotel. A user selects a hotel by providing input to the web page. Radisson Hotels' hotel-booking web site includes multiple pages that can be browsed by the user. For example, the web site has respective pages to search for hotels, browse deals, and discover all of Radisson's hotel locations.</p>

support user interaction with the one or more web pages via user inputs by the user of the client computer,

The screenshot shows the Radisson Hotels website. At the top, there is a navigation bar with links for RESERVATIONS, MY BOOKINGS, DEALS, DESTINATIONS, BRANDS, RADISSON MEETINGS, and RA. Below this is a dark grey banner with the text "Become a member in just one click." and "SIGN IN" and "JOIN" buttons. The main content area features a large promotional banner with the text "Double points, double rewards" and a sub-headline "Make your next trip twice as rewarding with 2X the points for stays at any of our 1,100+ hotels between February 1 and April 30, 2021." Below the banner is a "Register now" button. At the bottom, there is a search bar with fields for Destination (New York, NY, USA), Check-in (05 Mar 2021), Check-out (06 Mar 2021), Occupancy (1 room 1 adult), and Special rates (Lowest available rate). A red "SEARCH" button is on the right. A link for "Advanced search" is also present.

a map display area presenting a portion of an interactive map comprising a base map layer and at least one additional layer overlaid over the base map layer wherein each additional

The first web page view includes a map display area. The map display area presents a portion of an interactive map that includes a base map layer and at least one additional layer overlaid over the base map layer. Each additional layer contains at least one hotel location symbol located at an identified x, y, or z location relative to its containing layer or the base layer. Each hotel location symbol corresponds to a hotel in the list of hotels.

For example, Radisson Hotels' hotel-selecting web page includes a

layer contains at least one hotel location symbol located at an identified x, y, or z location relative to its containing layer or the base layer, and each hotel location symbol corresponding to a hotel in the list of hotels,

geographical map of an area in which one or more hotels in the list are located. The locations of the hotels are indicated by respective symbols on the map.

The screenshot displays the Radisson Hotels website interface. At the top, there is a search bar with fields for Destination (New York, NY, USA), Check-in (05 Mar 2021), Check-out (06 Mar 2021), Occupancy (1 room 1 adult), and Special rates (Lowest available rate). A 'SEARCH' button is present. Below the search bar, it states '8 hotels found in or near New York' with a 'HIDE MAP' link. A map of New York City is shown with several hotel locations marked by red pins. Below the map, there are filters for Price (USD 77.22 to USD 159.00), Amenities (Accessibility, Airport shuttle, Bar, Breakfast, Car rental), Hotel brands (Radisson, Country Inn & Suites), and Rating (8 hotels). Two hotel listings are shown: Radisson Hotel New York Times Square and Radisson Hotel New York Midtown-Fifth Avenue. Each listing includes a photo, address, distance from New York, a brief description, a 'See Members Only Rate' link, a non-member rate, a '35% OFF TODAY' badge, and a 'SEE ROOMS' button.

[4]

wherein the graphical interface enables a user to show or hide subsets of the hotel location symbols in a particular

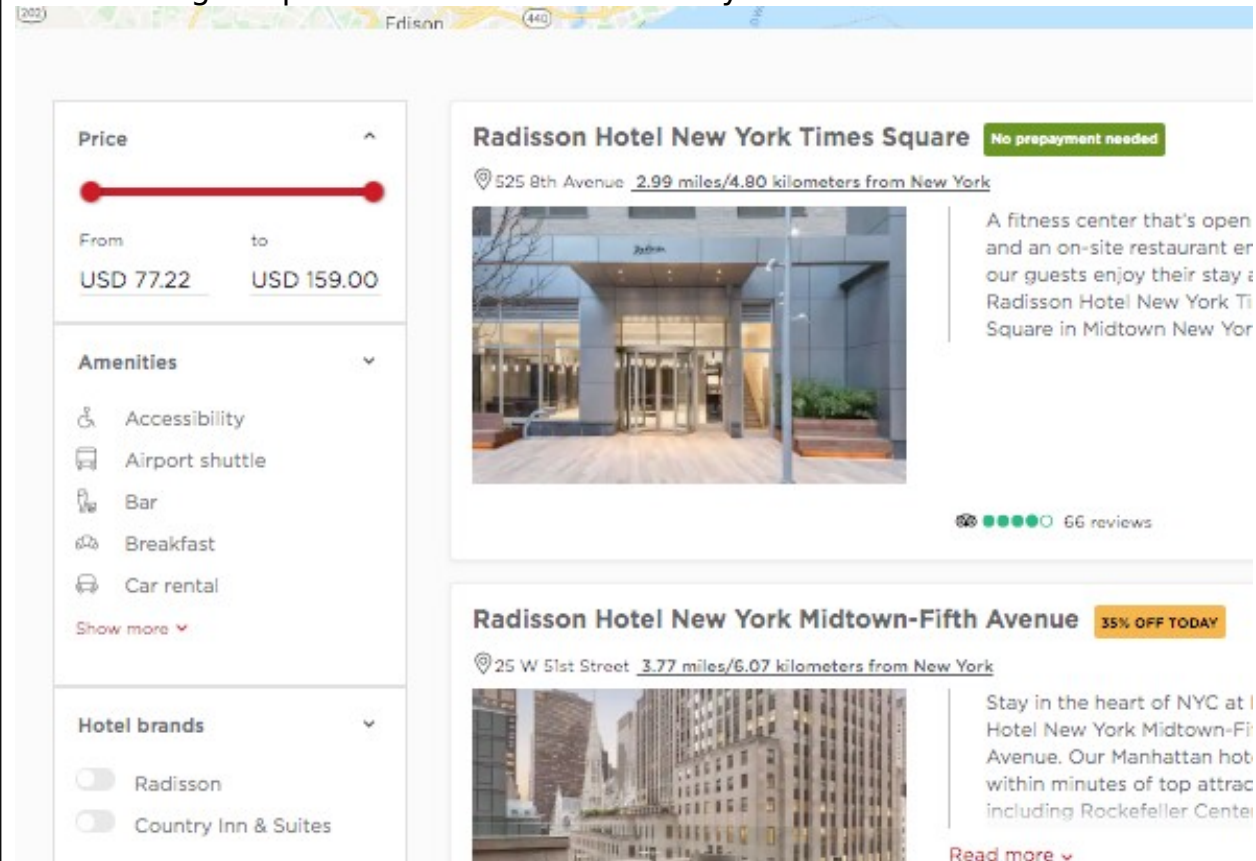

The graphical interface enables a user to show or hide subsets of the hotel location symbols in a particular layer of the map display area.

For example, Radisson Hotels' hotel-selecting web page has a filter of various criteria by which the user can refine the selection of hotels that are

layer of the map display area.

indicated on the map.

For example, the price per night can be used as a filter. By default it is set to the full range of prices of the hotels found by the search.

[4]

For example, with the price range set to the full range according to the search results there is no filtering of the hotels found by the search. In this example, eight hotels were found by the search and displayed on the map (Note the Country Inn & Suites by Radisson in Newark)

When the hotel location symbol for the Radisson Hotel JFK Airport is clicked on, that hotel location symbol is selected and information about that hotel is displayed and the information about the Country Inn & Suites by Radisson hotel in Newark is no longer displayed.

The screenshot displays the Radisson Hotels website interface. At the top, a map of New York City is shown with several Radisson hotel locations marked by green 'R' icons. A white overlay box on the right side of the map features the Radisson logo and details for the 'Radisson Hotel JFK Airport', stating it is 14.64 miles/23.57 kilometers from New York, with a price of USD 115.00 per night and a 'SEE ROOMS' button. Below the map, a sidebar on the left shows a vertical price slider with a red handle and the number '59.00'. The main content area below the map lists 'Radisson Hotel New York Times Square' with a green badge indicating 'No prepayment needed'. It provides the address '525 8th Avenue' and distance '2.99 miles/4.80 kilometers from New York'. A small image of the hotel entrance is shown, followed by a description: 'A fitness center that's open 24 hours and an on-site restaurant ensure that our guests enjoy their stay at Radisson Hotel New York Times'. The Radisson logo is also present in the bottom right of this section.
